Enter the numbers in your billing address (excluding the postcode).

Postcode Numbers   
Enter the numbers from the postcode of your billing address.

Place your order \*

Accept card payments on your website and link with full line item detail.

## Key Features

- Take payments directly from website (and/or back-office)
- Accept Visa, MasterCard and American Express including purchasing cards (Level 3)
- Seamlessly integrated with your existing order processing system
- Minimise your PCI DSS obligations with our PayPage secure card capture & tokenization functionality

### Web environment or back office

ITS Connect: E-commerce PayPage enables you to embed a fully flexible e-commerce PayPage in your web environment or existing order processing system.

### Styling

ITS can style the PayPage to align with the rest of the customer checkout look and feel. This gives the customer a consistent experience whilst having them enter card details directly onto the fully hosted ITS PayPage.

### Seamless integration

The PayPage is embedded into the checkout (typically in an iframe). Checkout will transfer to the PayPage in a separate web browser where the customer will enter their card details and then be directed back to the checkout.

### Secure card storage

Our lodged card functionality means you no longer risk storing card numbers on your systems. Card details are lodged once with us and all subsequent transactions are carried out simply by quoting a reference.

### Simple Reporting

The E-Statements service enables you to view all your recent transactions on demand. Create and download reports by a range of criteria and analyse all your submissions for easy reconciliation.

### Purchasing Card/Level 3

Submit Level 3 data to us via a file upload and we will match the data with the corresponding transaction processed through the PayPage.

**“Integrated Payments helped us win new business worth £10 million.”**

Michelle White, Director, Pertemps Recruitment

## What we do

### Card payment processing

- Level 1 and Level 3 card payment acceptance for B2B and B2C
- Suite of card payment solutions offering everything from virtual terminals to batch processing, e-commerce and in-store terminals (EMV chip and pin)

### Addendum data capture

- From Level 3 to Line Item Detail and Visa Global Invoice Standard (VGIS), we can capture enhanced invoice details
- Bespoke addendum data capture such as airline journey and car hire details
- Support purchasing card supplier enablement

### Secure data management

- Online card payment reporting solutions for merchants and commercial cardholders

## Why ITS?

### Great customer service & expert advice

- High quality support from our dedicated Client Services team
- Save time with straightforward, expert, advice from our experienced & knowledgeable team

### Data security

- Reduce your business risk by storing sensitive data in our secure data centre
- We are committed to data security and are a fully PCI DSS-certified payment service provider

### Trusted technology

- Over 20 years' experience developing innovative card payment services
- Suite of proven, robust card payment solutions to suit your business
- Trusted by banks, airlines and merchants to safeguard their data every day
